| Developed by: Robert Manarin (Course Framework provided by SD 23) | Date Developed: December 1, 2024 |
| School Name: Lake City Secondary | Principal's Name: Curt Levens |
| Superintendent Approval Date (for School Districts only): November 24, 2025 | Superintendent Signature (for School Districts only):  |
| Board/Authority Approval Date: November 24, 2025 | Board/Authority Chair Signature:  |
| Course Name: Mountain Biking 11 | Grade Level of Course: 11 |
| Number of Course Credits: 4 | Number of Hours of Instruction: 120 |

Board/Authority Prerequisite(s):

The student athlete must have experience riding mountain bikes on mountain terrain and be riding at an intermediate level as recognized by the International Mountain Bike Association (IMBA Appendix A). The student athlete will be assessed on a closed, safe, level, predetermined course using the criteria before being allowed into the course.

Mountain biking experience intermediate level:

- 10 to 20 days of experience on green and easy blue trails with avoidable Technical Trail Features (TTFs)
- Comfortable at slower speeds on technical blue trails with roots, forest debris, loose rocks, and tight single track. Must have experience on a cross-country mountain bike with front suspension or an Enduro full suspension mountain bike.
- Can ride, maintain balance, change gears and brake without thinking about it.

Special Training, Facilities or Equipment Required:

- The instructing teacher should be a mountain bike specialist who has background or coaching training in mountain biking, equipment maintenance experience, and outdoor first aid training. The program will be delivered by the individual on their own or with the assistance of external mountain bike professionals and volunteers authorized by the Cariboo-Chilcotin School District Administration. The number of instructors will be determined by the size of the class.
- The program will take place at indoor (Gym & Classroom) and outdoor (Trails & Bike Park) facilities. A trailer may be required to transport bikes to trails on some occasions.
- A safety-inspected modern Cross Country or Enduro Mountain bike with a minimum of disc brakes and front Suspension. Downhill bikes are discouraged as student athletes will typically ride to the approved trail networks.
- Cross Country/Enduro Mountain Biking trails (green/blue level as per International Mountain Biking Association standards)
- Appropriate safety gear, including but not limited to a helmet, knee pads, elbow pads and gloves.
- Mountain biking specific shoes (skate or running are acceptable), jersey and shorts/pants, including wet day waterproof or water-resistant jacket.

Course Synopsis:

Mountain biking 11 is designed to develop mountain biking skills and knowledge from a beginner level towards an intermediate level. The class will build on a variety of sport specific movements, skills, systems, and strategies related to mountain biking. The course is a cross country/enduro mountain biking course therefore the class will only be riding blue or green runs as outlined by the international mountain biking association which is in alignment with other school mountain biking programs. There will be uphill and downhill riding involved in the mountain bike course on single track dirt/grass/gravel/ tree roots/boardwalks and rocky terrain.

The class will focus on the fundamentals of the sport:

- Prioritizing safety, safety guidelines, and riding safely.
- Equipment checks and safety.
- Self-assessment of skill level and safe warm up activities.
- Clear communication skills.
- Choosing safe and appropriate terrain for students' ability level.
- Riding with knowledge of upcoming terrain and maintaining a safe riding pace.
- Consistent position and balance skills through the climbing, neutral and ready positions, combined with a good range of movement.
- Consistently maintaining an efficient cadence and straight chain line.
- Braking without skidding on loose terrain, using both brakes.
- Climbing (riding uphill) and descending (riding downhill) on technical, single track (beginner and intermediate) terrain.
- Riding on banked and flat corners on various terrain surfaces.

- Maintaining chosen line (trail to be ridden) in technical (roots/rocky/or uneven) terrain.
- Learning how to use front and rear wheel lifts or standing to navigate technical (roots/rocky/or uneven) terrain.
- Seated front wheel lifts using a pedal stroke to navigate technical (roots/rocky/or uneven) terrain.
- Learning how to ride switchbacks (slow, tight turns).

Goals and Rationale:

Mountain Biking 11 provides students with an alternative to traditional physical education programs. It combines elements of both team and individual sports, fostering personal growth, technical skill development, and a healthy active lifestyle. The mountain biking 11 program will allow students to participate in a sport in which they are an integral part of a team and experience the benefits of team sports such as having a coach, teammates, and a network of support fostering camaraderie.

In contrast to other team sports in which only a handful of athletes participate at one time on the court or field in mountain biking everyone can be on their own bikes improving their abilities at the same time also currently in BC every high school mountain biking team is automatically eligible for provincials as long as they have participated in at least one mountain biking competition within BC this will allow every student the opportunity to experience going to a provincial competition something they might not have the opportunity to do in other sports.

The mountain biking 11 program will give students the opportunity to follow a passion and love for the outdoors which will hopefully be part of a healthy lifestyle well into their future.

Aboriginal Worldviews and Perspectives:

The mountain biking program is all about the support and development of the individual athlete as a person and athlete, providing them with an opportunity to be connected to the community. The class will spend time training outside for engagement with land and nature. The class will offer groupings allowing the individual students to feel part of something bigger through a learning centred approach that is experiential by nature and aligned with the indigenous perspectives and knowledge. The role of the teacher in mountain biking Academy is one of support, learning side by side with the student athletes helping to develop a love for mountain biking and the outdoors. We will focus on and adopt the following guiding principles prepared by the British Columbia aboriginal sport recreation and physical activity partners council:

- indigenous peoples possess significant traditional knowledge and cultural teachings, which recognize the positive influence of physical activity and sports games have on holistic personal development.
- Indigenous people in British Columbia live in complex geographical environments and as such experience unique living conditions and social realities.
- Indigenous peoples hold personal dignity and well-being as the foundation of their cultures and maintain the inherent right to live healthy and active lives.

We will also be following the First Peoples Principles of learning:

- learning ultimately supports the well-being of the self, the family, the community, the land, the spirits, and the ancestors.
- Learning is holistic, reflexive, reflective, experiential, and relational.
- Learning involves recognizing the consequences of one's actions.

- Learning is embedded in memory, history, and story.
- Learning involves patience and time.
- Learning requires exploration of one's identity.

The course integrates respect for natural environments, reflecting Aboriginal perspectives on environmental stewardship and sustainability.

BIG IDEAS

Participation in mountain biking activities allows for the development of skills in a complex and dynamic environment.

Spending time outdoors allows us to understand our role in environmental awareness and stewardship in outdoor recreation and conservation.

Participating safely in mountain biking activities requires first aid skills, refinement of communication, teamwork, and collaboration.

Maintaining equipment in mountain biking improves our understanding of the bike and increases our awareness in the use of mountain biking technologies.

Personal fitness can be maintained and improved through regular participation in physical activities and by technology to monitor improvement.

Learning Standards

| Curricular Competencies | Content |
|--|--|
| <p><i>Students are expected to do the following:</i></p> <p>Mountain biking activity skills and healthy living:</p> <ul style="list-style-type: none">• Participate in a variety of mountain biking activities.• Develop and demonstrate a variety of skills for mountain biking activities.• Monitor exertion levels and energy levels during mountain bike activities.• Recognise nutritional considerations and other requirements for preparation for and preparation in mountain biking activities.• Explain how developing competence in mountain biking activities can increase confidence and encourage lifelong participation.• Maintain and do basic repairs on a mountain bike.• Understand their strengths and areas for growth. <p>Social responsibilities:</p> <ul style="list-style-type: none">• Implement ways to reduce potential impacts of mountain bike activities on the local environment.• Demonstrate awareness of cultural and place-based sensitivities regarding the use of outdoor locations <p>Collaboration, teamwork, and safety:</p> <ul style="list-style-type: none">• Collaborate with others in a variety of mountain biking activities.• Use applicable communication skills when interacting with others.• Demonstrate appropriate responses to emergency situations during mountain bike activities.• Demonstrate responsibility for personal safety.• Assess and manage skills during different levels (green/blue) of mountain bike activities | <p><i>Students are expected to know the following:</i></p> <ul style="list-style-type: none">• Health benefits of mountain biking activities.• Mountain biking activity knowledge and skills.• Preparation for mountain biking activities.• Environmental conditions.• First Peoples traditional practices and ecological knowledge related to activities in the local environment.• The role of environmental awareness and stewardship in outdoor recreation and conservation.• Strategies for adapting and responding to changing conditions and emergencies.• First aid skills and strategies for responding to emergencies.• Communicating in emergency situations.• Management of group dynamics and conflict in an outdoor environment.• Basic maintenance, use, and care of equipment and trails for mountain biking activities. |

Big Ideas – Elaborations

- Technical skill development: controlling speed, making power, riding through technical terrain, climbing terrain, managing drops and jumps, avoiding injuries, strengthening mental capacity, maintaining discipline and marching line and speed to skills to maximize bike flow.
- Tactile development: monitoring cardio and physical exertion to achieve realistic goals, learning to ride according to varying conditions.
- Learning to be active and live in the outdoors: learning and being active outdoors is holistic, reflexive, reflective, experiential, and rational in nature, will need to be active supports the well-being of the Self, the family, the community, and the land.
- Personal growth: how to be a leader in the environment using strategies for individual and team leadership, cooperation with others in Group settings, communicating effectively and with mutual respect for others and helping to build a positive community. Understanding that learning involves patience and time.
- Healthy lifestyle: living a life with proper nutrition, sleep, exercise, and hydration.,

Curricular Competencies – Elaborations

- Bike maintenance: Properly maintain and service basic components of your mountain bike to be able to ensure ride safety on the trails.
- Trail maintenance: Properly aide in the construction and maintenance of TTFs including berms, drops, track and other trail features.
- Technical skills: Safely ride single track mountain bike trails under control in uphill and downhill situations under various terrain and trail conditions.
- Personal health: Monitor health, cardio, nutrition, sleep, exercise, and hydration to achieve realistic goals when mountain biking.
- Trail preparation: Manage food (food preparation, storage in transportation, leave no trace principles, hygiene) and water (transportation, treatment, sources).
- Personal growth: Demonstrate belonging to a community through individual and team cooperation while using effective communication. Ride safely, within limits, while acquiring new mountain biking skills.
- Mental aspects: demonstrate motivation to live a healthy lifestyle involving exercise, overcoming nervousness, working in a team, and being accountable to others.
- Demonstrate understanding of cultural and place-based sensitivities: recognition and use of First Peoples territories, use of public land, private land, parks, and land stewardship.

Content – Elaborations

Skill development:

- Controlling speed (know stopping distances, brake with intention, braking over bumps and rough terrain).
- Making power (attention to posture, seated pedalling, standing pedaling, pedaling drills, sprinting, power tips).
- Cornering (basics of turns, bike geometry in turns, changing direction, ride smart lines through corners).
- Riding downhill terrain (coasting hills, rolling berms or ledges, drops, obstacles).
- Riding uphill terrain (common climbing errors, easy climbing, pedal geometry, body positioning).
- Controlling bike in the air (bumps, drops, jumps – various techniques for body and bike geometry for safe control).
- Avoiding injuries (chronic injuries, acute injuries, staying out of trouble, common mistakes and fixes, injury prevention, ride for a lifetime).
- Riding under varying conditions (roughness, slippery or wet, soft deep or loose dirt, avoiding ruts).

Content – Elaborations

Health:

- Benefits of mountain biking activities
- Nutrition, diet, lifelong sport

Preparation for mountain biking activities:

- Bike maintenance (cleaning, chain repair, tire repair, suspension adjustments, lubrication).

Outdoor awareness:

- First Peoples traditional practices and ecological knowledge related to activities in the local environment.
- The role of environmental awareness and stewardship and outdoor recreation and conservation
- Strategies for adapting and responding to changing conditions and emergencies.
- Bear awareness.

Communication and emergency situations:

- Management of group dynamics and conflict in an outdoor environment.

Recommended Instructional Components:

- Direct instruction
- Demonstrations
- Modeling
- Simulations
- Student in role
- Peer teaching
- Video analysis
- Experiential learning

Recommended Assessment Components: Ensure alignment with the Principles of Quality Assessment

- Journal entries and logs
- Student participation in the setting of criteria and the design of inquiries and self and peer assessments
- Monthly self assessments using technology- Strava regulatory APP for monitoring health and goals while mountain biking)
- Mountain Biking Class Learning Update reflection and goal setting
- Assessment on technical and riding skills by teacher (ongoing)

- Assessment on bike maintenance knowledge and skills by teacher (ongoing)

Additional Information:

The course is a Cross Country and Enduro mountain biking course. Therefore, the Mountain Biking 11 class will only be riding blue or green runs as outlined by the international mountain biking association which is in alignment with other school mountain biking programs. There will be uphill and downhill riding involved in the Mountain Biking 11 course on single track dirt/grass/gravel/ tree roots/boardwalks and rocky terrain. It aligns with other school mountain bike programs and adheres to safety standards.

There is a stigma that all mountain biking is dangerous. Mountain biking is not all about careening down hills and flying off jumps. The average speed attained on a mountain bike ride rarely exceeds 15 kilometers per hour. Cross country mountain biking is a sport that gets young people into the woods and away from the dangers of automobile traffic associated with Road cycling. There are risks associated with cross country and enduro mountain biking, but with proper skills instruction, and sound risk management practices, many of those risks can be proactively managed and mitigated in a cross country and enduro mountain biking program. The risks associated with cross country and enduro mountain biking are no worse than the risks of other high school sports such as hockey, skiing, and rugby with common injuries very similar to injuries associated with cross country running.

Appendix A: trail rating system

IMBA is the international mountain biking association that was formed in British Columbia and is now the internationally recognized authority on mountain biking policies including the mountain bike trail rating system.

| IMBA Trail Difficulty Rating System | | | | | |
|---|--|--|---|---|--|
| |  EASIEST WHITE CIRCLE |  EASY GREEN CIRCLE |  MORE DIFFICULT BLUE SQUARE |  VERY DIFFICULT BLACK DIAMOND |  EXTREMELY DIFFICULT DBL. BLACK DIAMOND |
| TRAIL WIDTH | 72" (1,800 mm) or more | 36" (900 mm) or more | 24" (600 mm) or more | 12" (300 mm) or more | 6" (150 mm) or more |
| TREAD SURFACE | Hardened or surfaced | Firm and stable | Mostly stable with some variability | Widely variable | Widely variable and unpredictable |
| AVERAGE TRAIL GRADE | Less than 5% | 5% or less | 10% or less | 15% or less | 20% or more |
| MAXIMUM TRAIL GRADE | Max 10% | Max 15% | Max 15% or greater | Max 15% or greater | Max 15% or greater |
| NATURAL OBSTACLES AND TECHNICAL TRAIL FEATURES (TTF) | None | Unavoidable obstacles 2" (50 mm) tall or less Avoidable obstacles may be present Unavoidable bridges 36" (900 mm) or wider | Unavoidable obstacles 8" (200 mm) tall or less Avoidable obstacles may be present Unavoidable bridges 24" (600 mm) or wider TTF's 24" (600 mm) high or less, width of deck is greater than 1/2 the height | Unavoidable obstacles 15" (380 mm) tall or less Avoidable obstacles may be present May include loose rocks Unavoidable bridges 24" (600 mm) or wider TTF's 48" (1,200 mm) high or less, width of deck is less than 1/2 the height Short sections may exceed criteria | Unavoidable obstacles 15" (380 mm) tall or less Avoidable obstacles may be present May include loose rocks Unavoidable bridges 24" (600 mm) or narrower TTF's 48" (1,200 mm) high or greater, width of deck is unpredictable Many sections may exceed criteria |
